Live and Secure Data on the Internet

To maximize productivity and ensure the safety of your crane operations, **APRS World, LLC**, offers the **Crane Wind Speed Logger**. Bolted to the tip of the crane, our Crane Logger provides data logging for historical records of wind conditions and live data for safety and operational decisions. Our design philosophy is that data is most important. Your data is available through a password protected, secure website and is stored in three locations to prevent data loss. With an optional in cab **Wind Speed Display**, live data can be viewed by the crane operator.

Anemometer with
Pivoting Mount

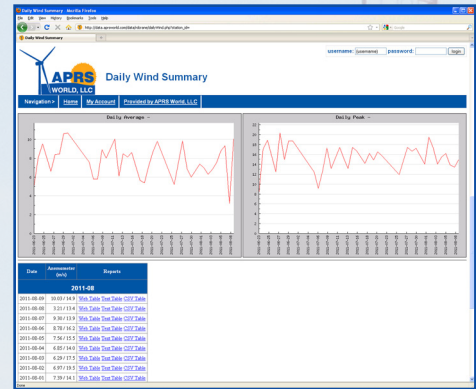

- Wireless transfer of data over GSM cell network
- Anemometer with pivoting mount for varying tip angles
- Stainless steel construction withstands harsh conditions
- Calibrated anemometer standard
- Solar powered with built-in GPS
- On-site installation and training available
- No cables to run
- Optional Wind Vane
