Drill 5/32"

Modification Instructions:

1) Use center punch to mark center of three holes
2) Place magnet in corner of box to trap any metal chips
3) Drill 5/32" holes at all three locations.
4) Use hole saw to enlarge antenna hole to 3/4"
5) Remove burrs from front and back
6) Carefully remove magnet and verify no loose metal chips in inverter

Installation Instructions:

1) Use #6-32 machine screws and lock nuts to attach PS2Tap to inside
of enclosure.
2) Disconnect cable from PowerSyncII front panel display and attach
PS2Tap bottom connector.
3) Run new supplied cable from PS2Tap top connector to front panel display.
4) Use zip ties to secure cable.

**Align template with
bottom, back, left of PowerSyncII**
