

## Wind Monitor II

*The Wind Monitor II is a basic wind speed display and data logger for a single anemometer. It is designed primarily for simple wind speed monitoring and data logging, recording the instantaneous wind speed at whatever interval you specify. Over 32,000 wind speed measurements may be stored and later downloaded to your computer.*

### FEATURES

- Bright and easy to read green LED display
- Logs and displays instantaneous wind speed (0-99 MPH)
- Anemometer and Wind Monitor II have locking RJ-45 connectors for easy wiring
- Adjustable log interval from 0.5 to 16,000 seconds
- 32,768 wind speed data points stored
- 7-20 volt DC input
- Consumes approximately 30mA
- ABS plastic case with mounting ears
- Microsoft Windows compatible download and configuration software for data logging
- All cables are included
- Requires either a RS-232 or USB port on computer for data logging capabilities
- Durable anemometer is built using high quality ball bearings, stainless steel hardware, and distinctive gold anodized aluminum cups – even works in high speed mobile applications.

### WIND MONITOR II PACKAGE – \$175 – USB OR SERIAL SAME PRICE

This package contains everything you need to get started. It includes an assembled and tested Wind Monitor II module with your choice of either an RS-232 or USB port, assembled and tested anemometer, 25 foot anemometer cable, AC adaptor (North American outlet configuration), computer cable, and printed manual.

### WIND MONITOR II PACKAGE WITHOUT ADAPTOR – \$170 – USB OR SERIAL SAME PRICE

This package contains everything listed above with a power connector pigtail in place of the AC adaptor.

### WIND MONITOR II ONLY – \$80 – USB OR SERIAL SAME PRICE

This is an assembled and tested Wind Monitor II module only.
